

PEAK
INDUSTRIES, INC.

Industry leader setting the standard for mobile tower vertical loading.

*LEADERS IN
TELECOMMUNICATIONS,
SURVEILLANCE &
ADVANCED
FABRICATION*

Industry leader setting the standard for mobile tower vertical loading.

WHO WE ARE

- Specialize in telecommunications, surveillance, and advanced fabrication
- Build the tallest, strongest, and most stable mobile hydraulic towers
- Serve industries demanding precision, performance, and reliability
- Apply over 40 years' experience to client needs
- Innovations include over 20 technology patents

Industry leader setting the standard for mobile tower vertical loading.

HOW WE SUPPORT CLIENTS

- Build the strongest towers available with low-twist and sway for better data collection and loading
- Overcome ground interference through greater mast height
- Lift the greatest equipment weight in the industry on platforms
- Provide flexibility of deployment through design

Industry leader setting the standard for mobile tower vertical loading.

CORE PRODUCTS & SERVICES

- Mobile Hydraulic Towers for cellular communication, radar units, sensor arrays, cameras, and drone mitigation systems
- Stand-alone telecommunication trailers, masts, and enclosures
- Rapid mobile-deploy surveillance vehicles with self-powered capabilities
- Custom hydraulic fabrication and engineering solutions

Industry leader setting the standard for mobile tower vertical loading.

DESIGN & FABRICATION CAPABILITIES

- CNC Laser Cutting System for precision cutting
- Robotic Plasma Cutting System (PCR42) combining CNC plasma, robotics, and vision systems
- Innovative machining, metal forming, welding, and assembly operations
- Custom designs built in-house to client technical and operational specifications

Industry leader setting the standard for mobile tower vertical loading.

INNOVATION & QUALITY COMMITMENT

- 21 registered patents applied in processes and products
- Constant design of new manufacturing methods, tools, and processes to increase efficiency such as the automated Inline Metal Column Speed Welder*
- Vertical alignment in-house of design and fabrication components

* Patent Pending

Industry leader setting the standard for mobile tower vertical loading.

DEDICATION TO CUSTOMER SUCCESS

- Full technical and operational design support throughout and after completion
- On-location training and service available for clients
- Best-in-industry warrantee, replacement, and refurbishment parts support for units
- Expanding into aerospace, military & defense and energy

INDUSTRY LEADERSHIP

- Combining telecommunications expertise, fabrication skill, and surveillance innovation
- Recognized leader in mobile tower and rapid-deploy systems
- Partner of choice for resilient, field-tested solutions
